★ PAPER ★

Exponential Quality

5 Reasons to Use Q² Paper...

Gentle to the Earth

- Q2 paper is manufactured from 100% farm grown Eucalyptus Trees, helping to preserve native rain forests.
- Eucalyptus trees yield a very white pulp, eliminating the need for chlorine bleaching an excessive processing.
- This keeps run-off water clean, protecting local streams and Rivers.

Better for Your Business

- Q2 paper is neutrally sized, assuring exceptional results on inkjet and laser printers, plain paper fax machines, copiers and offset presses.
- The even fiber distribution intensifies the natural whiteness in the paper, giving your documents added brilliance whether printed or in color or black and white.

1. A truly multi-functional paper for outstanding performance and productivity
2. Support use of a product made from a quickly-renewable resource, farm grown Eucalyptus trees.
3. Extreme brightness achieved using ECF (elemental chlorine free) farm raised Eucalyptus pulp.
4. Packaged using BOPP (Bi-oriented polypropylene), a 100% recyclable film providing outstanding moisture protection.
5. Our outer cartons are printed on one end with document storage templates and can be re-used as light storage boxes.

* TONER *

- Impact Office Products offers a full line of exceptionally high quality remanufactured toners for ink and laser jet printers.
- These cartridges, so well refined that they often exceed new HP product performance, have proven to be a smash hit with dozens of our key customers.
- Thousands of these cartridges have been sold by Impact.
- We have given our customers savings ranging from 10 to 25% on product cost, and this with absolutely no sacrifice on quality.

Why Use Remanufactured Cartridges?

- Remanufacturing cartridges uses 80% less energy than making new ones.
- A typical cartridge takes 1,000 years to decompose.
- Each laser cartridge consists of 2.5 lbs of plastic, along with rubber, steel and aluminum.
- Every year, nearly 400 million cartridges are thrown away — if placed end-to-end, they would stretch from California to Florida.
